

Vidhyakorn Mahd-Adam

RESEARCH ASSISTANT

About me

I am a research assistant in mathematical modelling, focusing on population-level models of health and disease. My current interest explores how human health and well-being can be modelled through the bio-psychosocial model and the capabilities approach. I primarily use mathematical modelling, supported by multimodal data collection and analysis, to inform, calibrate, and refine models. My goal in conducting research is to contribute to evidence-based policy development.

Interests

- Computational Methods
- Population Dynamic
- Capabilities Approach
- Bio-psychosocial Model
- Neurodiversity & EDI
- Social Deviant & -Others
- Social Theories of Health and Diseases

Ratchathewi
Bangkok, Thailand

SUMMARY

My interest in research and modelling is rooted in scientific curiosity, lived experience, and social observation. These experiences shape my commitment to marginalized communities, subaltern groups, and people often framed through social deviance. I believe human and social services, including health care, education, and youth and disability services, should move beyond treating difference as a defect, deficit, or disorder. Instead, they should strengthen human capabilities and support diverse people's potential, while recognizing how social and environmental conditions shape choices, actions, and opportunities.

As a queer, neurodivergent Muslim from southern Thailand, I identify with communities across Southeast Asia and other low- and middle-income contexts whose potential is often constrained by inequitable systems. This lived experience informs my commitment to advocating for equitable and inclusive health and social policies that support diverse people. I believe these values should shape how research is designed, conducted, and communicated. With an academic background in biomedical and health sciences, alongside a strong interest in social theories, I hope to develop this commitment further through formal PhD research.

EDUCATION

2023 M.Sc. (Biomedical and Health Informatics)

MAHIDOL UNIVERSITY

📍 BANGKOK, THAILAND

Thesis: *"Mathematical Modelling To Assess The Impacts Of Using Mobile Health Technology For Cross Border Travel In Controlling Of The Covid-19 Pandemics In Thailand"*.

Advisors: Assoc.Prof. Wirichada Pan-ngum, PhD.,

Assoc.Prof. Chawarat Rotejanaprasert, PhD., Dr. Panithee Thammawijaya, M.D., PhD.

Defense Committee Chair: Prof. Lisa Jane White, PhD.

2019 Bachelor of Public Health

SUKHOTHAI THAMMATHIRAJ OPEN UNIVERSITY

📍 NONTABURI, THAILAND

EXPERIENCES

2025 – now Consultant Researcher

MATHEMATICAL AND ECONOMIC MODELLING GROUP, MAHIDOL-OXFORD TROPICAL MEDICINE RESEARCH UNIT (MORU), FACULTY OF TROPICAL MEDICINE, MAHIDOL UNIVERSITY

📍 BANGKOK, THAILAND

– Developing dynamic transmission models for infectious disease research – Contributing to project coordination including ethics submissions, data administrative and analysis and field work preparation

2023 - 2025 Medical and Data Assistant

HEALTH ASSESSMENT PROGRAM, MIGRATION HEALTH

INTERNATIONAL ORGANISATION FOR MIGRATION (IOM THAILAND)

📍 BANGKOK, THAILAND

– Supported health assessment programmes for refugees and stateless persons across UNHCR-led schemes in Thailand

2016 - 2021 Claim Supervisor

INSURANCE CLAIM DEPARTMENT, ALLIANZ PARTNERS

📍 BANGKOK, THAILAND

PROJECTS

2025 - now Estimating an Economic Burden of Pneumococcal Disease and Economic Evaluation of the New Higher-Valent Pneumococcal Conjugated Vaccines Among Thai Older Adults

PROJECT FUNDED BY THAILAND RESEARCH FUND

Personal

Nationality: Thai

Thai Native

English Professional

Data/Tools

R

LaTeX/Quarto/Typst

Data Analysis

MS Office Suite

– Built an pneumococcal disease with age-structured dynamic transmission model for pneumococcal disease burden and evaluate the impact of adult and infant Pneumococcal-conjugate valent vaccine strategies on incidence and mortality.

2025 - now

Anthelmintic Resistance in Southeast Asia: Implications for Control and Elimination of Intestinal Helminths (AHR-SEA)

PROJECT FUNDED BY MMRC (UK) × CHRD (THE PHILIPPINES) × HSRI (THAILAND)

– Coordinating project administration, including ethics board submissions, and data analysis
– Managing field faecal sample collection, mass drug administration monitoring, socio-economic surveys, and discrete choice experiments

2026 - now

Mapping Inequities and Programmatic Profiles of Soil-Transmitted Helminth Interventions in Southeast Asia: A Systematic Review and Model-Based Network Meta-analysis

A PART OF THE PROJECT AHR-SEA UNDER THE SUPERVISION OF ASSOC.PROF. WIRICHADA PAN-NGUM, ASSOC.PROF. POOM ADISAKWATTANA, MAHIDOL UNIVERSITY

– Conceptualised the study and protocol, and contributed to co-reviewing, data extraction, analysis and manuscript writing

TRAININGS

2026

MIDSEA Summer School-2026:Track 3 Bayesian & Simulation-based Inference

MIDSEA NETWORK

 SARAWAK, MALAYSIA

2026

Health Economics Workshop

MAHIDOL-OXFORD TROPICAL MEDICINE RESEARCH UNIT, MAHIDOL UNIVERSITY  BANGKOK, THAILAND

2025

MORU & OUCRU Advance Statistics Course 2025: Analysis of Longitudinal and Correlated Data and Introduction to Bayesian Data Analysis

MAHIDOL-OXFORD TROPICAL MEDICINE RESEARCH UNIT, MAHIDOL UNIVERSITY  BANGKOK, THAILAND

2026

Health Policy Advocacy for Researchers Workshop

MAHIDOL-OXFORD TRANSLATIONAL INNOVATION PARTNERSHIP (MOTIP)

 BANGKOK, THAILAND

2025

MIDSEA Summer School-2025:Track 2 Simulation Techniques and Numerical Methods

MIDSEA NETWORK

 YOGYAKARTA, INDONESIA

PUBLICATION

2025

Vidhyakorn Mahd-Adam, Chawarat Rotejanaprasert, Saranath Lawpoolsri, Panithee Thammawijaya, and Wirichada Pan-ngum, "Mathematical modeling of public health policy for international travelers (PHPIT) : a case study of the COVID-19 pandemic in Thailand", *BMC Public Health* 26-68, 2025, doi: <https://doi.org/10.1186/s12889-025-25811-5>.

CONFERENCE

2022

Vidhyakorn Mahd-Adam, Panithee Thammawijaya, Chawarat Rotejanaprasert, and Wirichada Pan-ngum, "Data-driven mathematical model for cross-border control of COVID-19 - Reopening of Thailand's border", *Joint International of Tropical Medicine Meeting (JITMM)*, 2022, doi: .

2021

Vidhyakorn Mahd-Adam, Wirichada Pan-ngum, Chawarat Rotejanaprasert, and Panithee Thammawijaya, "Modelling of Health IT involved strategies in cross border controlling of COVID-19", *Joint International of Tropical Medicine Meeting (JITMM)*, 2021, doi: .
